

NEW FARJO HAIR INSTITUTE CLINIC

City Build have recently successfully delivered the extensive refurbishment, alteration and fit out works for the Farjo Hair Institute who are a world renowned hair replacement specialists based in Manchester City Centre.

The new Institute is a high specification research and education centre which explores and develops new pioneering hair transplant techniques and surgery. The project involved the complete renovation of a four storey town house with tight constraints in the city centre.

The fit out of the building provided new consultation, procedure, conference and clinic facilities on one site for the first time.

Due to the institutes many attributes the building is often visited by potential clients and delegates who attend the many seminars held. The Client was quite specific that every detail within the building would reflect the high standards of the institute.

The two procedure rooms again were delivered with bespoke high quality hygienic furniture fitted out to meet the Clients specific needs.

The challenging 10 week programme was only achieved through the open book, collaborative working ethos of ourselves, the design team and the client. We believe this was a major contributing factor in the success of the project which ensured we were able to deliver a high quality bespoke building, to the highest standards within budget.
