

## MATHEMATICS BLOCK

### WINSTANLEY COLLEGE

The existing building has been refreshingly clad in Trespa panelling, with the leaning and contrasting harmony oak reveals and soffits giving the maths block a real contemporary characteristic. Bespoke curtain walling envelops the front elevation, with the lively colours giving a thoroughly modern and vibrant feel to the building. Internally, the classrooms were remodelled and underwent a full refurbishment including new floor, wall and ceiling finishes. The glazed partitions that lead on to the corridor, and the feature walls in each of the classrooms further opens up and brightens the building, giving the classrooms a lively and fresh learning environment for the students.

#### Market Sectors:

Office  
Commercial  
Industrial  
Residential  
Educational  
Healthcare  
Leisure  
Retail  
Public Sector

The new M&E services installation future proofs the maths block, and the specially considered lighting and ventilation strategy provides an excellent and comfortable learning environment.
